SURGICAL PROCEDURES

LIPOSUCTION WITH AND WITHOUT FAT TRANSFER

Vaser and/or power assisted liposuction with optional fat transfer to the face/body.

ABDOMINOPLASTY

An abdominoplasty is a procedure that flattens your abdomen by removing extra fat and skin and tightening muscles in your abdominal wall. This surgical procedure is also known as a tummy tuck.

BROW, NECK, FACELIFT

Enhance the appearance through the removal of excess skin and fat while tightening the underlying muscles.

BREAST AUGMENTATION, REDUCTION, and/or LIFT WITH AND WITHOUT IMPLANTS

Surgical enhancement of breast using various surgical techniques with and without the use of saline/silicone implants.

J-PLASMA-SURGICAL SKIN TIGHTENING

Revolutionary minimally invasive procedure using HELIUM PLASMA for skin tightening anywhere in the face and body.

SURGICAL SCAR REVISION

Procedure to surgically alter the cosmetic appearance of a scar.

OTOPLASTY

Cosmetic ear surgery designed to change the position, shape, symmetry or size of your ears.

GYNECOMASTIA

Surgical procedure that removes excess fat and breast tissue to sculpt flatter, more masculine chest contours. This can be accomplished with either liposuction, breast tissue removal or a combination of both.

FACIAL IMPLANTS

A facial implant is a small, solid device that is placed underneath the skin to augment the physical structure of the face.

BLEPHAROPLASTY

Blepharoplasty involves removing excess fat, skin, and muscle from underneath and around your eyes.

TORN EARLOBE REPAIR

a procedure that can help restore the appearance of your ears by correcting tears or splits caused either by jewelry or other trauma.

RHINOPLASTY

Rhinoplasty, known colloquially as a "nose job," is a cosmetic surgery that improves the size and shape of the nose to create a more symmetrical appearance.

MED SPA

FACIALS

CLASSIC EXPRESS FACIAL

Designed to give maximum results in minimal time, this facial involves cleansing, steam, light extractions, toning and moisturization. This treatment works with all skin types to reveal more youthful, and healthy skin.

DEEP CLEANSING FACIAL

As an extension of the classic facial, this customizable treatment will provide deep extractions for maximal face decongestion and improve skin texture. Accompanied by a relaxing facial massage and mask appropriate for your skin type; this facial is formulated to refresh, renew, and revitalize your skin.

ANTI- AGING FACIAL

A deep cleaning facial with the addition of antiaging serums and peptides followed by ultrasound and radiofrequency to improve skin elasticity to reduce fine lines and wrinkles.

GOT YOUR BACK FACIAL

Back facials are beneficial in treating those tough-to-reach areas, targeting a variety of skin care needs such as clogged pores, acne, and dehydrated skin. You can expect a deep cleansing of the back, exfoliation, extractions, and a customized mask.

VAJAFACIAL

Targets in-grown hairs, dead skin cells and smooths bumps of those intimate areas to prevent acne, in-gowns, improve hyperpigmentation and maintain healthy, hydrated, and blemish free skin.

BUTT FACIAL

Butt facials address skin concerns like butt acne, blemishes, and uneven skin tone. Butt facials work to address skin concerns and smoothen the appearance of your derriere. Perfect for pairing with microdermabrasion and acne LED treatments.

TEEN/PRE-TEEN FACIAL

For teens/pre-teens, both boys and girls going through changes that affect skin appearance. Our soothing adaptation of our classic deep facial cleans pores and calms redness and breakouts while moisturizing and leaving skin glowing.

ACNE FACIAL

Acne facials incorporate all the components of a deep cleansing facial but focus on extractions and the removal of all clogged pores. Serums, an anti-acne mask and gentle moisturizers are used along with LED light therapy to help stimulate collagen and kill acne-causing bacteria.

ADD ONS (add on to facial Services)

MICRODERMABRASION

Minimally invasive treatment that gently removes the thicker, uneven outer layer of skin. It improves the appearance of sun damage, wrinkles, fine lines, age spots, acne, scarring & melasma while improving overall skin tone and texture.

DERMAPLANING

Dermaplaning is a skin care treatment that removes dead skin cells and vellus hair (peach fuzz) with a small scalpel making its surface radiant and smooth.

MASK

Choose from a variety of masks that provide hydration and moisture while conditioning, toning, and reducing inflammation leaving the skin smooth with a glow like appearance.

Hydrating mask | 24K Gold mask | Hydro Jelly mask

LED LIGHT THERAPY

Different wavelengths of light in LED lights, including blue and red, penetrate the skin at different depths. This penetration assist biological processes that help the skin rejuvenate and heal, decrease inflammation and kill acne reducing bacteria.

LIGHT PEEL

Combination enzymes and glycolic acid that provides chemical exfoliation to remove dead skin cells while replenishing hydration to reveal smoother and vibrant skin.

HYDRA/DERMABRASION

Gentle, crystal free exfoliation that uses water, oxygen, vibration and suction to deep cleanse and hydrate the skin. Can be customized a variety of serums and include ultrasound, Radiofrequency and/or cold therapy.

AQUAGOLD: SUPERFICIAL

"micro-channels" are created to the outermost layer of the skin to deliver micro-dosages of medicine to addresses your personalized skin concerns. Aqua Gold has been shown to reduce breakouts, improve the visibility of acne scars, fine lines, and wrinkles, diminish hyper pigmentation, and improve skin tone and texture

CHEMICAL PEELS.

Perfect Peel

The Perfect Peel is a safe, effective peel for all skin types and ethnicities. It will improve the overall clarity, tone, and texture of your skin. This peel can also reduce hyper-pigmentation, sun damage and Melasma. The Perfect Peel stimulates the production of collagen, resulting in firmer, more youthful skin while also reducing the appearance of pore size. It takes about 7 days to completely heal from this peel.

ZO 3 Step Peel

A multifunctional epidermal peel designed to provide longer-lasting treatment benefits. Utilizing a blend of exfoliants, a 6% concentration of retinol and multi-action agents that stimulate collagen and restore moisture balance, it evens skin texture for softer, smoother, tighter looking skin. In-office treatment followed by an at-home regimen that may require 4-6 week skin pre-conditioning.

MASSAGES

LYMPHATIC MASSAGE 30 -60 MIN (PRICE VARIES)

Gentle massage technique that encourages the movement of retained lymph fluids around the body. Lymphatic massage is recommended to detoxify the body and encourage healing after surgery.

SWEDISH MASSAGE 30-90 MIN

Swedish massage involves soft, long, kneading, as well as light, rhythmic, tapping strokes on the top layers of the muscles. It relieves muscle tension that is both relaxing and energizing.

DEEP TISSUE MASSAGE 30-90 MIN

Deep tissue massage targets the deeper layers of the muscles and soft tissue in the body. It helps relieve chronic aches and pains by applying sustained pressure, with slow, deep strokes that target the inner layers of the muscles and connective tissue.

HOT STONE MASSAGE 60-90 MIN

Hot stone massage uses smooth, heated stones placed on specific parts of the body. The localized heat and weight of the stones warm and relax the targeted muscles. Swedish massage techniques are used in combination with the hot stones.

PRENATAL MASSAGE 60 MIN

Prenatal Massage is a nurturing and stress reducing massage for women who are pregnant. It is recommended after the first trimester to reduce the pains and strains of pregnancy.

BODY CONTOURING

MADEROTHERAPY/WOOD THERAPY

Cellulite removing technique that involves different wooden elements in a series of frequent movements. This therapy stimulates the lymphatic system and assist in freeing accumulated toxins, fat, and cellulite.

VACUUM THERAPY/CUPPING THERAPY

Special cups are used create suction; this provides necessary nutrients/blood flow to the area being treated and promotes healing. Cupping Therapy can be very relaxing and help to reduce muscular restrictions, scars and adhesions, to decrease swelling, and increase range of motion.

THERAPEUTIC ULTRASOUND

Utilized to deliver a high frequency mechanical vibration to facilitate healing at a cellular level. It is often used to reduce pain, increase circulation and increase mobility of soft tissues. Additionally, the application of ultrasound can be helpful in the reduction of inflammation, reducing pain and the healing of injuries and wounds.

ULTRASOUND CAVITATION

The Cavitation procedure uses ultrasound and radio waves to break down fat cells and cellulite without affecting nearby organs and cells. The disrupted fat cells are processed naturally. Ultrasound Cavitation is simple, pain free with no downtime needed..

RADIOFREQUENCY (EXILIS)

Pain free and non-invasive treatment designed for skin tightening, fat reduction, or both using radiofrequency to gently heat the dermis, induce collagen production, and/or breakdown fat cells for the body to safely excrete.

CRYOTHERAPY

Non-Surgical fat reduction procedure that uses cold to eliminate localized fat deposits. Otherwise known as fat freezing.

M-SCULPT - High Intensity Electromagnetic therapy

Noninvasive body toning and sculpting treatment that reduces fat and builds muscle in a 30 minute session.

MED SPA

OTHER SERVICES

CARBOXYTHERAPY

Infusion of carbon dioxide gas under the skin to increase blood circulation and stimulate new collagen production. It can be performed anywhere on the body, including the face, neck, arms, stomach, buttocks, and legs. Carbon dioxide gas can even be injected into delicate or thin-skinned areas, such as around the eyes. The treatment is usually intended to reduce fatty deposits, as well as the appearance of cellulite, stretch marks, acne scars, fine lines and wrinkles, and even dark under-eye circles.

MICRO-NEEDLING WITH AND WITHOUT PRP (Vampire's Facial) (Face/Scars/Stretch Marks/Hair restoration)

Minimally invasive treatment, causing thousands of microscopic injuries across the treatment area. These injuries induce the body's natural healing factors, sending collagen and elastin to repair and rejuvenate the skin. Can be performed with topical serums or Platelet Rich Plasma (PRP) derived from the patient's own blood which contains several growth factors and cytokines that aid in cell communication and promote healing.

MUSCLE E-STIMULATION THERAPY

Therapeutic treatment that applies electrical stimulation via electrodes that results in muscle contraction. Excellent treatment for muscle spasms, and muscle weakness.

DERMAL LIGHTENING

Cosmetic treatment used to lighten abnormally darkened skin. Can be used to safely treat a variety of body parts to include all intimate areas.

BB GLOW

Skin treatment that places semi-permanent light-reflecting pigments and hydrating serums underneath the skin, to replicate the radiant, dewy and smoothing effect of BB cream. It rejuvenates your skin and adds a soft blur to the skin, effectively tightening pores.

WAXING

Full body waxing available.

TEETH WHITENING

Paint on and light system of teeth whitening that can dramatically whiten teeth (4 shades) in just one hour.

LASH LIFT AND TINT

A quick treatment that curls and darkens your lashes, leaving you with a glamorous look from the moment you get out of bed.

HYPERBARIC OXYGEN THERAPY

Boosts the amount of oxygen in your blood, which temporarily restores your body's normal levels of tissue function and blood gases, and increases its capacity to fight infection and promote healing.

INJECTABLES

NEUROMODULATORS (BOTOX/DYSPORT/XEOMIN/JEVEAU)

Temporarily reduces or eliminates dynamic fine lines and wrinkles. Commonly treated areas are frown lines, forehead, and crows feet. Thick neck bands, jaw muscles, lip lines, marionette lines and/or gummy lines may also be treated.

HYALURONIC ACID (HA) DERMAL FILLER (RESTYLANE/JUVERDERM/BELOTERO/VERSA)

Fills lines and wrinkles in the face and neck typically lasting 9-12 months. Common uses include the lips, lip lines, cheeks, nasolabial folds, marionette lines, undereyes, earlobes, nose and hands..

RADIESSE

Longer lasting compound that provides filling effect to areas of more severe volume loss such as cheeks, nasolabial folds, chin, and Jawline while stimulating your body's own natural collagen.

SCULPTRA (PLLA)

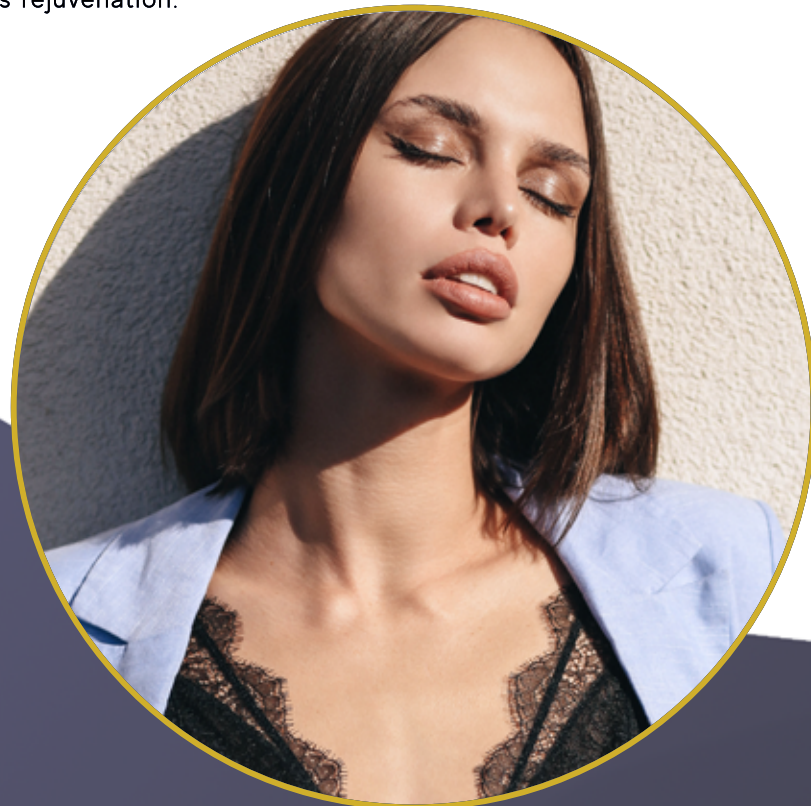

Unique collagen stimulator that fills and helps revitalize collagen and elastin production while increasing the skin's inner structure and volume over 2 years.

HYALURONIDASE (HYLANEX)

Injection of protein Hyaluronidase to aid in helping your body reabsorb Hyaluronic acid dermal filler products.

PDO THREAD LIFTING

PDO thread is a minimally invasive procedure that does not require general anesthesia nor big incisions for your patients. There are tiny barbs strategically placed and molded all around the thread. Once the threads are placed into the skin, the barbs anchor onto sagging skin, and the thread can be maneuvered to achieve a naturally youthful and defined look. Not only can it improve the appearance of sagging skin, PDO (polydioxanone) can also help promote the stimulation of collagen and neovascularization, which helps to improve skin elasticity, texture, fine lines, and volume for a timeless rejuvenation.

MESOTHERAPY (FAT REDUCTION/ CELLULITE)

Mesotherapy is a technique that uses injections of vitamins, enzymes, hormones, and plant extracts to rejuvenate and tighten skin, as well as remove excess fat. This technique that uses very fine needles to deliver a series of injections into the middle layer (mesoderm) of skin. Mesotherapy is used to: Remove fat in areas like the stomach, thighs, buttocks, hips, legs, arms, and face and also improve the appearance of cellulite and tighten loose skin.

KENALOG INJECTION

In intralesional steroid injection injected directly into a lesion on or immediately below the skin. Can be used to treat a variety of conditions such as alopecia, keloids/hypertrophic scars, granulomas, psoriasis, cystic acne and other inflammatory skin conditions.

SCLEROTHERAPY

Sclerotherapy is the method for eliminating superficial telangiectasias (spider veins) by the injection of a Polidocanol, a sclerosing agent into the veins. The majority of most patients will have a significant clearing of the veins in a few sessions.

B12 SHOTS

This essential water absorbable vitamin can be quickly replaced via injections. It plays a vital role in brain function and the production of DNA and red blood cells. Benefits may include increase energy levels and decreased fatigue.

LIPOSHOT (WEIGHT LOSS SHOTS)

Lipotropic injections contain vitamin B12 and MIC—a combination of methionine, inositol, and choline. They help you to maintain your energy level while on your low-calorie weight loss plan and support healthy fat burning.

GLUTATHIONE

Glutathione is the body's strongest internal (endogenous, meaning created by the body naturally) antioxidant. As the ultimate detoxifier and it helps fights oxidative stress, other benefits include improvement the of immune function, reduction of inflammation, supporting your body break down and purge fat, promoting high energy and mental clarity, anti-aging and lightening properties while brightening skin by decreasing hyper-pigmentation and inhibiting melanin production in cells, can improve quality of sleep and combat stress

IRON INFUSION

Iron infusion is a process in which iron is transferred to your body intravenously. It is usually prescribed to people who have iron-deficiency anemia and where it can't be treated with iron supplements and dietary changes. For example, you will be asked to undergo iron infusion if you can't take iron by mouth, and you need to increase the iron levels in your body quickly to avoid certain medical complications or prepare for surgery!

NUTRITIONAL VITAMIN THERAPY

IMMUNITY

Strengthens your immune system so you feel better fast. How your immune system is performing can ultimately determine how you will perform by preventing you from becoming ill and speeding up your recovery time after being sick. The Immunity IV therapy consists of ascorbic acid, B-complex vitamins and Zinc, which prevents infection and increases your body's healing process. Improve your immune system with the Immunity IV therapy.

QUENCH

Hydrates and combats fatigue due to dehydration. Dehydration is notorious for negatively affecting your mood, but with the Quench IV therapy you can restore your levels of hydration and ultimately restore your mood. Quench features a blend of ascorbic acid, B-complex vitamins and an essential blend of minerals. With this treatment, you can potentially experience reduced inflammation, improved circulation and a restoration of essential vitamins.

INNER BEAUTY

Minimizes the appearance of wrinkles, acne and tired skin. Inner Beauty is like undergoing a cosmetic treatment, but intravenously. The IV therapy features ascorbic acid, a blend of B-complex vitamins and Biotin. The therapy can help give you a more youthful glow and let your radiance shine. In addition, because it includes Biotin, inner beauty promotes healthy hair and nails.

ALLEVIATE

Reduces bloating, irritability, abdominal discomfort and more. The Alleviate IV therapy consists of B-complex vitamins, Calcium, Hydroxo B12 and Magnesium. By receiving this IV therapy, you will experience a more elated feeling with reduced irritability. The Hydroxo B12 component is specialized for treating low levels of Vitamin B12, which promotes healthy brain function, improving your outlook on life.

REBOOT

A quick and effective method to quickly combat hangover symptoms within 30-60 minutes. Our treatment rehydrates your body, helps you flush out toxins, restores nutrients lost during a night of heavy drinking, and cleanses your system.

LIBIDO BOOST

Intimacy enhancement for both men and women. This drip will help increase your sexual endurance, improve your energy, and reignite the sparks in your life. Contains a mix of essential vitamins and amino acids to relax blood vessels and increase blood flow to those vital organs.

GET UP AND GO

Burns fat, increases energy levels and boosts your metabolism. The Get Up & Go IV is formulated with B-complex vitamins that will keep your skin and blood cells healthy, while also converting nutrients into energy. The IV therapy also consists of a special blend of essential amino acids that will have you performing your absolute best in any athletic event.

RECOVERY AND PERFORMANCE

Decreases recovery time and increases your athletic performance. Recovery & Performance is an excellent IV therapy choice if you need to quickly recover after an injury. The IV therapy features ascorbic acid, B-complex vitamins, a blend of amino acids and minerals. This mixture is sure to help lessen your recovery time, putting you back in the game quicker. Ascorbic acid, in particular, is an antioxidant that can protect your cells from free-radicals, help you absorb iron, boost your collagen production and immunity.

MYERS COCKTAIL

Alleviates chronic symptoms, stress and chronic pain. Provides hydration and increased immunity. Reduces migraines, seasonal allergies, fatigue and inflammation. This famous IV cocktail was developed by John Myers, a physician from Baltimore, MD, over 60 years ago and features a mixture of Magnesium, Calcium, Vitamin C, Vitamin B and B-complex and electrolytes. Restore your inner balance with Myer's Cocktail.

LASER SERVICES (FOTONA YAG LASER)

PERMANENT HAIR REDUCTION

Fotona's Nd:YAG lasers incorporate revolutionary pulse-control technology and a proprietary three-dimensional treatment pattern (FRAC3®) to provide safe and effective hair reduction. Unlike other wavelengths, only Nd:YAG is safe to use on all skin types.

FOTONA 3D/4D LASER REJUVENATION

Groundbreaking non-surgical face lifting procedure resulting in a rejuvenated, natural-looking appearance. 3D/4D treatment tightens and volumizes from the inside resulting in immediate rejuvenation, tightening, glow, and complexion. With little or no downtime and no need for needles, surgery or anesthesia.

SMOOTHEYE

Smooth Eye is a new and exciting non-ablative Fotona SMOOTH mode treatment for tightening of the eyes and reducing the appearance of eye wrinkles. SmoothEye significantly tightens loose and aging skin of the eyelids and periocular region with little-to-no downtime and maximum patient comfort, making this a very sought after non-invasive cosmetic procedure.

LIPLASE

Non-invasive treatment, without the use of dermal fillers. Allows patients produce their own collagen in their lips. With several adjusted passes the characteristics of 'ideal lips' can be achieved such as fullness, volume, correct balance between the upper and lower lips and a well-defined vermilion border.

HAIR RESTORATION

This dynamic system utilizes laser energy for safe, predictable, and natural hair restoration results. It is clinically proven to restore natural hair growth in just a few short treatments. By combining Nd:YAG and Er:YAG wavelengths, this advanced technology is effective at reaching the deepest layers of the scalp and hair follicles to activate the natural healing process. Results offer restored hair growth for natural, yet noticeable results.

SCAR/ STRETCH MARK REDUCTION

Fotona's Er:Yag wavelength is used to effectively remove or reduce the appearance of scars/ stretch marks to achieve substantial improvements in the aesthetic appearance and overall tissue quality by activating tissue remodeling. Which results in volume, reduced redness, and decreased overall visibility.

MOLE/SKIN TAG REMOVAL

This is ideal for treating skin tags, moles, and other pigmented lesions. Clinical studies have shown that Er:YAG lasers provide an unmatched approach to the treatment of moles and skin tags, up to 93% after just one treatment. This treatment results in minimal to zero scarring post healing.

NIGHTLASE

Non-invasive, patient-friendly laser treatment for increasing the quality of a patient's sleep. NightLase reduces the effects of sleep apnea and decreases the amplitude of snoring by means of a gentle, laser-induced tightening effect caused by the contraction of collagen in the oral mucosa tissue.

SPIDER VEIN/VASCULAR TREATMENT

Laser treatments protocols for the removal of many types of vascular lesions, including spider veins, hemangiomas, vascular malformations such as port-wine stains, telangiectasias, venous lakes and angiomas.

ACTIVE ACNE

Laser based protocol that targets sebaceous glands to reduce the risk of developing new inflammatory acne lesions. A complementary laser technology can be used to improve the appearance of acne scars via skin resurfacing.

TIGHT SCULPTING

Fotona TightSculpting® is a unique dual-wavelength, non-invasive laser treatment for sculpting and skin tightening on all body areas. The exclusive delivery modes are used in concert for hyperthermic adipocyte destruction and collagen remodeling with exceptional results. The procedure is a fast, safe, and effective non-invasive alternative to laser lipolysis, with no consumables or downtime required for your patient.

NAIL FUNGUS

Revolutionary, patient-friendly method for treating onychomycosis (toenail fungus). It is a simple and effective procedure that uses the power of Nd:YAG laser light to heat evenly throughout the depth of the effected nail and skin tissue, effectively weakening and killing parasitic fungi which have infected the patient's nails.

WEIGHT LOSS

PHENTHERMINE (ADIPEX)

Amphetamine-like prescription medication used to suppress appetite. It can help weight loss by decreasing your hunger or making you feel full longer. Like other prescription weight-loss drugs, phentermine is intended to be used as part of an overall weight-loss plan. It is indicated for people who are obese, and who have failed to lose enough weight with diet and exercise alone – not for people who want to lose just a few pounds. Phentermine is a Schedule IV drug, a classification given to drugs that have a potential for abuse, although the actual potential appears to be low.

AMINO ACIDS AND PEPTIDES

Use of prescription peptides that have shown to be effective in a number of ways to support weight loss. Several have a history of use as appetite suppressants, which together with diet and exercise, may help patients lose weight.

SEXUAL WELLNESS

LABIOPLASTY

FAT TRANSFER TO PENIS/VULVA

Performed with combination liposuction to harvest fat. This procedure allows for Fat grafting to the genitals such as penis and vulva/labia to can increase the size and girth.

3/4 (O-SHOT AND P-SHOT)

HORMONE REPLACEMENT THERAPY

Pellets are the most natural way to deliver bio-identical hormone replacement therapy (BHRT) in both men and women. Pellets deliver a consistent release of hormone levels over an extended period of time, typically 3-6 months.
